

!! NOTICE !! NOTIFICATION !! REMARQUER !! BEACHTEN !! إشعار

This is to bring to your knowledge that SRB Bearings since 2017 has introduced NEW Orange and Black color boxes as shown in picture below (Fig. 1). The construction of the box is upgraded to increase the strength of the packing and also equipped with additional security features like integrated hologram embedded in the box itself to overcome the duplicate / fake / counterfeit substandard SRB bearings circulating in your market. We urge the users not to buy any SRB bearing with OLD box design as it might be FAKE and made from poor quality steel which is very dangerous at the time of functioning and pose a threat to you and your vehicles life.
